SCHOOL OF EDUCATION AND LEADERSHIP
COLLEGES OF EDUCATION

END OF YEAR TWO SEMESTER TWO EXAMINATIONS, 2024/2025
B.ED. PROGRAMME

COURSE CODE: TEJS 256
COURSE TITLE: THEORY AND PRACTICE OF GEOGRAPHY

---

***Instruction:*** Answer **all** questions in Section A and any **three** in Section B. **All questions must be answered in the answer booklet.**

**Time: 2 hours**

## SECTION A
**[25 Marks]**
**Attempt all the questions in this section.**

Carefully read the test items and choose the most suitable answer from options A - D.

1. Which of the following is a key contributor to modern or contemporary geography?
   A) Strabo
   B) Carl Ritter
   C) Alexander von Humboldt
   D) Both B and C

2. Which classical scholar emphasized empirical observation in geography?
   A) Herodotus
   B) Aristotle
   C) Ptolemy
   D) Hecataeus

3. Which period saw the rise of quantitative geography?
   A) Classical
   B) Medieval
   C) Contemporary
   D) Renaissance

4. The spatial tradition in geography is concerned with:
   A) The relationship between humans and the environment
   B) Locational analysis
   C) Geological formations
   D) Regional customs

5. The area studies tradition emphasizes:
   A) Global climate patterns
   B) The uniqueness of regions
   C) Quantitative analysis
   D) Remote sensing

6. The tradition focusing on distribution patterns of phenomena is:
   A) Spatial
   B) Man-land
   C) Ecological
   D) Cultural

7. Cognitive description involves:
   A) Emotional analysis
   B) Conceptual understanding and perception
   C) Measuring landforms
   D) Ecological modeling

8. Temporal analysis studies:
   A) Space only
   B) Economic structures
   C) Changes over time
   D) Political divisions

9. A model in geography is a:
   A) Real-world object
   B) Physical landscape
   C) Simplified representation of reality
   D) Universal law

10. One disadvantage of using models in geography is that:
    A) They are always accurate
    B) They oversimplify complex phenomena
    C) They are universal truths
    D) They never require data

11. The Gravity Model explains interaction based on:
   A) Land quality
   B) Distance and size of populations
   C) Soil fertility
   D) Water availability

12. Which method would most likely be used in urban land-use planning?
   A) Functional ecological
   B) Morphometric
   C) Temporal
   D) Cognitive

13. Evaluate the importance of interdisciplinary approaches in geographic research.
   A) Interdisciplinary approaches are unnecessary in geographic research.
   B) Interdisciplinary approaches allow researchers to draw insights from multiple fields.
   C) Interdisciplinary approaches are only relevant to human geography.
   D) Interdisciplinary approaches are too complex.

14. Which concept helps study past climate change impacts?
   A) Temporal analysis
   B) Area tradition
   C) Morphometric study
   D) Functional analysis

15. Which of the following best describes the scope of Geography?
   A) study of celestial bodies only
   B) study of earth's physical features and human activities
   C) study of ancient civilizations exclusively
   D) study of biological organisms only

16. One significant application of the Growth Pole Theory lies in the
   A) identification of development regions
   B) planning of infrastructural investments
   C) elimination of regional disparities
   D) restricting industrial growth

17. Malthusian theory primarily focuses on
   A) technological advancements
   B) population growth and food supply
   C) distribution of land
   D) impact of climate change

18. How did geography evolve in the 20th century?
   A) It became highly quantitative and spatial
   B) It focused solely on landscape paintings
   C) It relied entirely on explorers' accounts
   D) It removed all regional approaches

19. A scholar uses Aristotle's writings to discuss climate zones. What kind of geographical thinking is being applied?
   A) Classical philosophical geography
   B) Empirical medieval traditions
   C) Regional analysis of the future
   D) Spatial systems of the present

20. A teacher compares al-Idrisi's maps with those of Ptolemy. What are they practicing?
   A) Environmental impact study
   B) Historical geographic comparison
   C) Mathematical landscape modeling
   D) Modern field cartography

21. How does contemporary geography differ from classical approaches?
   A) It uses only qualitative techniques
   B) It emphasizes spatial analysis and data.
   C) It relies on religious cosmology
   D) It ignores natural environmental patterns

22. In what way did Arab geographers influence later European thinkers?
   A) They avoided field-based studies
   B) They focused solely on desert navigation
   C) They preserved and translated Greek texts
   D) They produced only artistic maps

23. A professor argues that contemporary geography is more interdisciplinary than classical geography. What supports this view?
   A) It dismisses spatial analysis in favour of abstraction studies
   B) It excludes physical geography from modern debates all the time
   C) It integrates economics, sociology, and environmental science
   D) It relies solely on ancient philosophies and exploration around the globe

24. A learner explains why the Age of Exploration was significant in geographic development. What reason best fits?
   A) It focused only on local topographical surveys
   B) It led to improved mapping and spatial knowledge
   C) It limited geographic knowledge to religious texts
   D) It reinforced classical theories of Earth's shape

25. What is the purpose of validating results in geographic research?
   A) To prove a theory
   B) To collect more data
   C) To ensure the accuracy and reliability of findings
   D) To formulate a new hypothesis

## SECTION B
**[75 Marks]**

**Answer any *three* questions from this section. Each question carries 25 marks.**

1. a. Define the scientific method in geography. (5 marks)

   b. Describe **four** main steps involved in applying the scientific method in geographical studies. (10 marks)

   c. Explain how the application of the scientific method helps to place geography within the sciences. (10 marks)

2. a. Define the Innovation Diffusion Model (7 marks)

   b. Discuss the **five** categories of a person's tendency to accept or adopt the innovation (10 marks)

   c. Assess **two strengths** and **two limitations** of the model in explaining geographical concepts. (8 marks)

3. Explain the four (4) main traditions in Geography postulated by William Pattison in 1964. (25 marks)

4. Compare and contrast the geographic thought of the Ancient Era with that of the Modern Era. (25 marks)

5. With reference to examples, analyze the impact of human activities on ecosystems and the role of ecological analysis in understanding these impacts.
