SCHOOL OF EDUCATION AND LEADERSHIP

COLLEGES OF EDUCATION

END OF YEAR ONE SEMESTER TWO EXAMINATIONS, 2024/2025

B.ED. PROGRAMME

COURSE CODE: TEEG/TEUP/TEJS 102

COURSE TITLE: SOCIAL, CULTURAL, AND PSYCHOLOGICAL BASES OF LEARNING

Instruction: Answer **all** questions in Section A and any **three** in Section B.

Time: 2 hours

SECTION A

[25 Marks]

Answer all the questions in this section.

1. What key principle of growth and development emphasizes that development occurs in an orderly sequence from simple to complex behaviors?
   A. Principle of integration
   B. Principle of cephalocaudal development
   C. Principle of hierarchical organization
   D. Principle of proximodistal development

2. In Kolb's learning model, which learning style combines Abstract Conceptualization and Active Experimentation?
   A. Diverger
   B. Converger
   C. Accommodator
   D. Assimilator

3. Which domain of development involves changes in the ability to control and coordinate muscles and physical movements?
   A. Cognitive development
   B. Emotional development
   C. Physical development
   D. Social development

Chief Examiner: Dr. John Sedofia

4. What type of motivation comes from external rewards such as grades, praise, or monetary incentives?
   A. Intrinsic motivation
   B. Extrinsic motivation
   C. Self-determination
   D. Achievement motivation

5. According to VAK learning styles, which type of learner benefits most from hands-on activities and physical movement?
   A. Visual learner
   B. Auditory learner
   C. Kinesthetic learner
   D. Verbal learner

6. Which stage of moral development, according to Kohlberg, is characterized by following rules to avoid punishment?
   A. Conventional level
   B. Post-conventional level
   C. Pre-conventional level
   D. Social contract level

7. What environmental threat during prenatal development can significantly impact fetal growth and development?
   A. Excessive exercise
   B. Maternal stress
   C. Maternal alcohol consumption
   D. Loud noises in the environment

8. Eugenia and Eugen are twins, but there are noticeable differences in height and weight between them. In the case of these twins, growth and development are,
   A. continuous processes
   B. cumulative
   C. individualized processes.
   D. maturational.

9. In the context of learning styles, what is the primary characteristic of a Diverger in Kolb's model?
   A. Focuses on practical applications
   B. Prefers theoretical analysis
   C. Values concrete experience and reflection
   D. Emphasizes systematic planning

10. What aspect of development follows the cephalocaudal principle?
    A. Emotional maturity
    B. Physical growth
    C. Cognitive development
    D. Social skills

11. During which of Jean Piaget's stages do children master the concept of animism?
    A. Sensorimotor
    B. Pre-operational
    C. Formal operational
    D. Concrete operational

12. What distinguishes intrinsic motivation from extrinsic motivation?
    A. External rewards
    B. Internal satisfaction
    C. Social recognition
    D. Tangible benefits

13. How does the VAK learning model contribute to educational practice?
    A. Standardizes teaching methods
    B. Eliminates learning differences
    C. Accommodates diverse learning preferences
    D. Reduces classroom management issues

14. What characterizes the Assimilator learning style in Kolb's theory?
    A. Practical application focus
    B. Theoretical and abstract thinking
    C. Hands-on experimentation
    D. Social interaction preference

15. Which environmental factor most significantly affects cognitive development?
    A. Genetic predisposition
    B. Stimulating environment
    C. Physical exercise
    D. Peer relationships

16. What term describes the developing human between 2nd and 9th weeks after fertilization?
    A. embryo
    B. blastula
    C. fetus
    D. zygote

17. How does emotional development influence learning?
    A. Affects only social relationships
    B. Impacts cognitive processing
    C. Influences only motivation
    D. Determines physical growth

18. What principle explains that development proceeds from general to specific responses?
    A. Cephalocaudal principle
    B. Proximodistal principle
    C. Integration principle
    D. Differentiation principle

19. Which learning style best supports abstract conceptualization?
    A. Concrete experience
    B. Active experimentation
    C. Reflective observation
    D. Theoretical analysis

20. What characterizes effective reinforcement in learning?
    A. Delayed response
    B. Immediate feedback
    C. Random application
    D. Infrequent use

21. Kwame is 2 years old, and Adzo is 8. What terms will psychologists use to designate the development periods of these children?

    A. Both children are toddlers
    B. Kwame is a toddler; Adzo is in middle childhood
    C. Kwame is in the preschool period; Adzo is in the middle childhood period
    D. Kwame is considered to be in early childhood, and Adzo is in late childhood

22. Abu and Fusena were born on the same day in the same hospital, only a minute apart. If both sets of their parents are the same weight, what other factor is likely to influence their weights, if there is any difference in their eventual weights?
    A. Quality of their diet
    B. Overall athletic skills
    C. How soon they are physically active
    D. Timing of a growth spurt during adolescence

23. A woman is 49 years old and pregnant. Therefore, her chances of having a child with . . . . . .are higher than average.
    A. Anoxia
    B. Down's syndrome
    C. Fetal alcohol syndrome
    D. Haemophilia

24. The ability of a two-year-old Malik to control and coordinate the movements of the various parts of the body in performing activities is called...
    A. coordination
    B. movement
    C. motor development
    D. Development

25. During which stage of human development does an organism develop major organ systems?
    A. fetus
    B. zygote
    C. embryo
    D. blastula.

SECTION B

[75 Marks]

Answer any three (3) questions in this section. All questions carry equal marks.

1. As a newly posted teacher, you are to educate your colleague teachers on the implications of sex determination. Discuss five (5) points that you would use to convince your colleagues. **[25 marks]**

2. (a) With appropriate examples, distinguish between growth and development. **[10 marks]**

   (b) Explain each of the following principles of growth and development.
   - i. Growth and development proceed in stages **[5 marks]**
   - ii. Growth and development are cumulative **[5 marks]**
   - iii. Growth and development are characterized by critical periods **[5 marks]**

3. a) Discuss any three (3) potential effects that threats to growth and development can have on teaching and learning.

   b) Discuss two (2) strategies that teachers can use to minimize the effects of the threats to growth and development.

4. Discuss five (5) sources of threats to perinatal development. **[25 marks]**

5. a) Describe one characteristic each of children at the Trust versus Mistrust and the Intimacy versus Isolation stages of socio-emotional development according to Erik Erikson. **[10 marks]**

   b) Discuss three (3) educational implications of Erik Erikson's socio-emotional development theory. **[15 marks]**
