END OF SEMESTER ONE EXAMINATIONS FOR LEVEL 300, 2021/2022

B.ED. PROGRAMME

COURSE CODE: **TEJS 363**

COURSE TITLE: **PROCESSES AND PROCEDURES IN FOODS AND NUTRITION**

Instruction: Answer **all** questions in Section A and any **three** questions in Section B.

Time: **2 hours**

SECTION A

[25 Marks]

Answer all the questions in this section.

1. The two proteins that combine to form gluten are gliadin and ----------
   a. Carbon dioxide
   b. Glutenin
   c. Graham
   d. Raising agents
2. Which of the following is not a mechanical means of incorporating air into flour products?
   a. Beating
   b. Creaming
   c. Melting
   d. Sieving

Instructor:

3. Activities involved in home improvement are:
   a. Continuous maintenance, building and improvisation.
   b. Continuous maintenance, innovation and improvisation.
   c. Improvisation, creativity and construction
   d. Innovation, creativity and maintenance.
4. The reason why other types of flour do not give the same results as wheat flour is that they do not make appreciable amounts of a substance which is known as?
   a. Dough
   b. Elastic
   c. Gluten
   d. Steam
5. ---------- give special flavor to savoury baked products
   a. Colour
   b. Liquid
   c. Seasonings
   d. Yeast
6. The type of flour that produces weak gluten which gives products a more tender texture is called?
   a. All-purpose flour
   b. Hard flour
   c. Soft flour
   d. Wheat flour
7. The enzyme that converts starch into dextrin is
   a. amylase
   b. Innertase
   c. Maltase
   d. Zymase

Page 215

8. When too much egg is used in yeast mixtures they usually become
   a. Heavy
   b. Light
   c. Porous
   d. Spongy
9. I am a flour-based food product, small and unleavened cake, typically crisp, flat and sweet?
   a. A biscuit
   b. A bread
   c. A cake
   d. A doughnut

Instructor:

10. In order for cakes to rise ---------- are added to the mixture
    a. Baking powder
    b. Fat
    c. Sugar
    d. Yeast
11. Cakes are classified in many different ways, which of the following is not a way in which cakes are classified based on the method used in mixing the ingredients?
    a. Melting method
    b. Moulded method
    c. Rubbing in method
    d. Whisking method
12. Batters differ from doughs because they
    a. Are more sticky
    b. Can be used for many dishes
    c. Have more ingredients
    d. Have more liquid
13. When one sprinkles yeast into warm water containing a little sugar it becomes?
    a. Fresh
    b. Frothy
    c. Smooth
    d. Tasty
14. The success of a baked dish depends on
        i. How it is mixed
        ii. How the ingredient are measured
        iii. The temperature used for baking
        iv. How it is served
    a. i, ii and iii only
    b. ii, iii and iv only
    c. i, iii and iv only
    d. i, ii and iv only
15. Which of the following is not a type of batter used in flour confectionery?
    a. Cream batter
    b. Drop batters
    c. Panada or thick batter
    d. Pouring or thin batter
16. Pressed or piped biscuits are usually made using the

nstructor:

a. Creaming method
b. Melted fat method
c. Rubbed - in method
d. Sponge method

17. Which of the following can cause cakes to cracks badly?
    a. Cooking for too long
    b. Too little baking powder
    c. Too little liquid used
    d. Too much sugar
18. The major utilities needed in the home include
    a. Fuel, radio and water
    b. Lighting, fuel and water
    c. Water, lighting and telephone
    d. Water, radio and telephone
19. They are simply substances, mainly gases, which make flour products light, porous and increase in volume, what are they?
    a. Gases
    b. Oven temperature
    c. Raising agents
    d. Steam
20. Kitchen where firewood is used for cooking will need
    a. A very high ceiling with fans
    b. Adequate doors and floor space
    c. Adequate window space and ventilation
    d. Large floor space and windows
21. Which of the following is not part of the three main categories of confectioneries?
    a. Chocolate and chocolate products
    b. Flour confectionery
    c. Pastries confectionery
    d. Sugar confectionery
22. Cake rises but sinks in the middle cannot be attributed to one of the following?
    a. Oven door opened too frequently
    b. Oven too hot and temperature not reduced
    c. Too much raising agent used
    d. Too much treacle or syrup used
23. All the following are basic ingredients for flour cookery except?
    a. Baking sheets
    b. Eggs
    c. Flour

Instructor:

d. Sugar

24. During baking which part of the oven is considered the hottest part?
    a. The down part
    b. The entire oven
    c. The middle part
    d. The top part
25. Raising agents are substances introduced into mixtures to make them light and ---------
    a. Flaky
    b. Heavy
    c. Porous
    d. Spongy

SECTION B [75 Marks]

Answer any three questions in this section.

Q.1

a. Explain how to purify water in the home using

i. Boiling method ii. Filtration method

iii. Chemicals method (12 marks)

b. State the sources of water and give example of each. (6 marks)

c. State and explain the types of water. (7 marks)

Q.2

a. Explain what pastries are in flour confectionery. (6 marks)

b. Explain six methods of incorporating fat into flour. (9 marks)

c. Explain the principles underlying pastry making. (10 marks)

Q.3

a. State five faults that can occur in cakes (5 marks)

b. Explain two possible reasons for each fault stated in 1(a) (10 marks)

c. Explain five ways in which one can use physical or mechanical means to incorporate air into a mixture during baking. (10 marks)

Q.4

a. Mention five fuels used in the kitchen. (5 marks)

b. Explain in detail TWO advantages and TWO disadvantages of each of the fuels mentioned in 2(a) (20 marks)

Q.5

a. Explain the concept home improvement. (8 marks)

b. State the aim of home improvement. (8 marks)

c. State the types of materials used for the surfaces in the home. (9 marks)

Q.6

a. State and explain the types of batters used in confectionery science? (15 marks)

b. What is leavening agent?- (5 marks)

c. List two examples of leavening agents used in flour mixtures. (5 marks)

$2MaCO_3 \rightarrow CO_2 + Ma_2 + 2H_2O$

Instructor:
