B.ED. PROGRAMME

COURSE CODE: TEJS 363

COURSE TITLE: PROCESSES AND PROCEDURES IN FOODS AND NUTRITION

General Instruction: This paper is made up of two sections, **A** and **B**. Answer **all** questions in section **A** and three questions in section **B**. The duration for both sections *is* **2HRS (120 minutes)**.

Section A - (25marks)

Each question is followed by four options lettered A to D. Read each question carefully and select the correct or best option on the question paper. Each question carries (1 mark).

1. Which of the following is **NOT** a mechanical means of incorporating air into flour products?
   a) Beating.
   b) Creaming.
   c) Sieving.
   d) Yeast.

2. Which one of the following is **NOT** a classification based on the method used of mixing the ingredients of Biscuits?
   a) Batter biscuits.
   b) Creaming biscuits.
   c) Rubbing-in biscuits.
   d) Whisked or sponge biscuits.

STUDENT'S ID NO:_____ SIGNATURE: _____

3. Which one of the following is the best substance used in introducing raising agent for making bread?
   a) Carbon dioxide.
   b) Leavening agent.
   c) Steam.
   d) Yeast.

4. The reason why other types of flour do not give the same results as wheat flour is that they do not make appreciable amounts of a substance which is known as _____.
   a) dough
   b) elastic
   c) gluten
   d) steam

5. The type of flour that produces weak gluten which gives products a more tender texture is called?
   a) All-purpose flour.
   b) Hard flour.
   c) Soft flour.
   d) Wheat flour.

6. I am a flour-based food product, small and unleavened cake, typically crisp, flat and sweet. What am I?
   a) A biscuit.
   b) A bread.
   c) A cake.
   d) A doughnut.

7. In the process of baking yeast, cells feed on a substance and reproduce to produce carbon dioxide. What is the name of the substance?
   a) Air.
   b) Steam.
   c) Sugar.
   d) Water.

8. Cakes are classified in many ways. Which of the following is **NOT** a way in which cakes are classified based on the method used in mixing the ingredients?
   a) Melting method.
   b) Moulded method.
   c) Rubbing in method.
   d) Whisking method.

9. When one sprinkles yeast into warm water containing a little sugar it becomes? _____
   a) Fresh
   b) Frothy
   c) Smooth
   d) Tasty

STUDENT'S ID NO:_____ SIGNATURE: _____

10. A mixture consisting chiefly of flour, egg, and milk or water and being thin enough to pour or drop from a spoon or a mixture used as a coating for food that is to be fried is known as _____
    a) Batter
    b) Coating mixture
    c) Dough
    d) Flour mixture

11. The method of incorporating air into flour products using a whisk is termed as?
    a) Biological means
    b) Chemical means
    c) Mechanical means
    d) Physical means

12. The process of preparing koose by beating the beans flour vigorously with the hand with the intention of incorporating air into the batter is termed as _____
    a) Biological means
    b) Chemical means
    c) Mechanical means
    d) Physical means

13. Which of the following is not a type of batter used in flour confectionery?
    a) Cream batter.
    b) Drop batters.
    c) Panada batter.
    d) Pouring batter.

14. Which of the following can be attributed to cakes that crack badly?
    a) Cooking for too long.
    b) Too little baking powder.
    c) Too little liquid used.
    d) Too much sugar.

15. Cakes made by placing fruits at the bottom of the cake pan before the batter is poured on it is known as
    a. Cup side cake
    b. Layer side cake
    c. Loaf side cake
    d. Upside-Down cake

16. Baked product should be removed from the pan immediately to prevent it from _____.
    a. shrinking and becoming soggy
    b. sticking and becoming soggy
    c. still rising and becoming soggy
    d. sweating and becoming soggy

STUDENT'S ID NO:_____ SIGNATURE: _____

17. Pressed or piped biscuits are usually made using the _____method.
    a. Creaming
    b. Melted fat
    c. Rubbing in
    d. Sponging

18. The basic ingredients for making queen cakes are _____.
    a. Bicarbonate of soda, Eggs, Ginger, Margarine
    b. Eggs, Essence, Flour, Sugar,
    c. Eggs, Essence, Flour, Water
    d. Eggs, Flour, Margarine, Sugar

19. Which one of the following can be added to sugar to keep it from crystalizing before boiling?
    a. Glucose.
    b. Gluten.
    c. Honey.
    d. Treacle.

20. Which of the following determines the success of a baked dish?
    I. how it is mixed.
    II. how the ingredients are measured.
    III. the temperature used for baking.
    IV. how it is served
    a. I, II and IV only
    b. I, II and III only
    c. I, III and IV only
    d. II, III and IV only

21. They are simply substances, mainly gases, which make flour products light, porous and increase in volume, what are they?
    a) Gaseous agents
    b) Temperature agents
    c) Raising agents
    d) Steaming agents

22. Which of the following is **NOT** part of the three main categories of confectioneries?
    a) Chocolate confectionery
    b) Flour confectionery
    c) Pastries confectionery
    d) Sugar confectionery

STUDENT'S ID NO:_____ SIGNATURE: _____

23. Which one of the following is **NOT** a reason why Cake rises but sinks in the middle?
    a) The oven door opened too frequently.
    b) The hot oven is left too hot.
    c) Too much raising agent is used.
    d) Too much treacle or syrup is used.

24. Which one of the following will **NOT** be the outcome if too much baking powder is used in baking a product?
    a. A coarse texture
    b. Bitter taste in product
    c. Shrinkage of product
    d. Sunken fruit in product

25. During baking which part of the oven is considered the hottest part?
    a) The down part
    b) The entire oven
    c) The middle part
    d) The top part

STUDENT'S ID NO:_____ SIGNATURE: _____

Section E - 75 Marks

*Read each question carefully and answer **any three** questions from this section of the paper. Each question carries (25 marks).*

Q1	a	State five faults that can occur in cakes	5 marks
	b	Explain two possible reasons for each fault stated in 1(a)	10 marks
	c	Mention 5 guidelines for the use of gas fuel.	10 marks
Q2	a	Mention five fuels used in the kitchen.	5 marks
	b	Explain vividly one advantage and one disadvantage of each of the fuels mentioned in 2(a)	10 marks
	c	Outline 5 ways of conserving water in the home	5 marks
	d	Mention five differences between batters and doughs	5 marks
Q3	a	Explain the following terms in flour confectionery i. Sifting ii. Beating iii. Whisking iv. Creaming v. Glazing	10 marks
	b	Discuss water as a basic utility in the house	15 marks
	c	Mention five fuels used in the kitchen.	5 marks
Q4	a	State and explain five ways in which one can use physical or mechanical means to incorporate air into a mixture during baking.	20 marks
	b	Write down the chemical representation of the reaction that takes place when bicarbonate of soda is heated.	5 marks

STUDENT'S ID NO:_____ SIGNATURE: _____

Q5	a	List five surfaces found in the food laboratory and explain the types of materials used in making these surfaces.	10 marks
	b	State the 3 principles of cake preparation	6 marks
	c	Mention 4 ways in which fat can be incorporated into flour when making pastries	4 marks
	d	List five sources of water in the home	5 marks
