END OF SEMESTER TWO EXAMINATIONS, 2024/2025

TIME: 2 HOURS

COURSE CODE: TEJS 282

COURSE TITLE: APPLICATION OF THEORIES AND PRINCIPLES IN FOOD AND NUTRITION

INSTRUCTIONS: This paper consists of Sections A and B. Answer all the questions in Section A and three from Section B.

SECTION A

[25 marks]

Answer all the questions in this section.

1. The substances found in food that our bodies require for growth, development, maintenance and the proper functioning of various physiological processes is_____.
   A. biochemical
   B. chemical
   C. nutrition
   D. nutrient
2. The nutrient that serves as the primary source of energy to the body, regulates blood sugar levels, and supports other functions is_____
   A. carbohydrates
   B. fats
   C. minerals
   D. protein

3. The nutrient that builds and repairs body tissues and provides energy when other sources are insufficient is_____.

A. carbohydrates
B. minerals
C. proteins
D. vitamins

4. During cold days the internal temperature of the body is maintained. What nutrient regulates the body's temperature?

A. Fat
B. Mineral
C. Vitamins
D. Water

5. Akosua fell from a tree but none of her vital organs was affected. What nutrient help protects the vital organs from injury?

A. Fat
B. Minerals
C. Protein
D. Water

6. Failing to meet calcium needs increases the risk of _____.

A. anemia
B. bleeding gum
C. osteoporosis
D. scurvy

7. Which of the following diseases or infections can be developed by people who lack or are deficient in vitamin C?

A. Anaemia
B. Bone pain
C. Goiter
D. Scurvy

8. Quality protein which is needed for proper growth and development can be obtained from_____.

A. animal source
B. fats and oils source
C. plant source
D. vegetable source

9. The learners are not growing well and easily fall ill because they are not eating well. What is the health condition of these learners?

A. Deficiency
B. Imbalance
C. Malnutrition
D. Overnutrition

10. A cooking method that involves submerging food in hot oil or fat which is typically used to achieve a crispy and a browned look while cooking the food quickly is_____

A. boiling
B. frying
C. steaming
D. stewing

11. Cereals and grains as a group are a good source of _____.
   A. carbohydrates
   B. fat
   C. mineral
   D. vitamins
12. When starch is cooked by moist heat, it_____.
   A. caramelizes
   B. denatures
   C. dextrinizes
   D. gelatinizes

13. After eating meals containing fats, it takes a long time before one feels hungry again. Why do fats have a high satiety value? Because they _____.
   A. add flavour to the diet
   B. contain essential amino acids
   C. are found in meat
   D. are slowly digested
14. Fruits and vegetables are rich sources of_____.
   A. carbohydrates
   B. fat
   C. protein
   D. vitamins and mineral salts
15. Aunty Akos has been eating meals high in fats regularly. What can excessive intake of fat lead to?
   A. Enhanced physical performance
   B. Improved metabolism
   C. Obesity and related health conditions
   D. Strong bones and teeth
16. What are the end products of fat digestion?
   A. Amino acids
   B. Carbohydrates and sugars
   C. Glycerol and fatty acids
   D. Vitamins and minerals
17. Yaa cannot see well in the night. What vitamin can she be lacking? Vitamin_____
   A. A
   B. B
   C. C
   D. D
18. Margerine is formed from hardening of oil. This process is called _____
   A. condensation
   B. distillation
   C. hardening
   D. saponification
19. Ama complains of stomach upset every time she consumes milk. What condition could she be suffering from?
   A. Lactose intolerance
   B. Milk intolerance
   C. Protein intolerance
   D. Stomach intolerance

20. When egg is boiled it solidifies. What process is this?
    A. Coagulation
    B. Condensation
    C. Dextrinization
    D. Flocculation

21. Cassava and rice belong to the _____ food group.

22. Nuts and beans belong to the _____ food group.

23. The cooking method which enhances flavour is _____.

24. The cooking method which increases the energy content of the food is _____.

25. _____ is the most effective teaching method for home economics.

SECTION B

[75 marks]

Answer **three** questions from this section.

1a. Write brief notes on the following Trade/Vocations in Food and Nutrition (Catering Establishment). (20 marks)

i. Food Vending
ii. Small canteen and chop bars
iii. Snack bars
iv. Restaurants
v. Fast food joints

1b. State three (3) roles of the International Federation of Home Economics (IFHE) (3 marks)

1c. Identify any two National Home Economics Associations that are in Ghana. (2 marks)

2a. As the caterer for an end-of-service dinner for the headmaster of a school,

i. state and explain two (3) types of fish with two examples under each that you will use for the preparation of the meal. (2 marks for each type and 1 mark for each example = 12 marks)

2b. Explain the four forms of milk available in the Ghanaian market. (8 marks)

2c. State two (5) uses of milk. (5 Marks)

3a. Differentiate between entrepreneurship and entrepreneur. (3 marks)

3b. State and explain 5 marketing strategies used in the catering industry and give examples of each. (2 marks each = 10)

3c. Discuss six teaching strategies that can be used in Home Economics to help students identify and develop profitable business opportunities from their practical skills? (2 marks each = 12)

4a. Explain the principle of nutrient bioavailability. (5 marks)

4b. Explain how any five preparation and cooking methods used for local dish can be adapted to maximize the absorption of iron and calcium in a typical Ghanaian diet (2 marks each = 10 marks)

4c. In what five ways can Home Economics students be guided to apply the concept of nutrient bioavailability when preparing traditional Ghanaian meals to improve iron and calcium uptake? (2 marks each = 10 marks)

5a. Discuss the food groups (5 marks).

5b. What is a balanced diet? (5 marks)

5c. Discuss any six ways that Home Economics teachers can guide students to apply the principles of a balanced diet when planning and preparing culturally appropriate meals for different age groups. (2 marks each = 12 marks)

5d. List any three local meals which can be classified as balanced diet (1 mark each = 3 marks).
