COLLEGES OF EDUCATION

END OF SECOND SEMESTER EXAMINATION FOR LEVEL 200, 2024/2025
B.ED PROGRAMME

COURSE CODE: TEUP 204
COURSE TITLE: PSYCHOLOGY OF LEARNING IN MIDDLE CHILDHOOD

Instruction: Answer **all** questions in Section A and any **three** questions in Section B.

Time: 2 hours

SECTION A

[25 marks]

Answer All The Questions In This Section.

1. At age 3, Kofi could not walk due to weak muscles, bones, and nerves responsible for walking. This indicates a deficit in …
   A. Development
   B. Epigenesis
   C. Growth
   D. Maturation

2. Growth and development occur in a normative sequence. This means growth and development …
   A. are cumulative in nature
   B. are influenced by both heredity and environmental factors
   C. are continuous processes
   D. proceed from general to specific

3. In growth and development, **epigenesis** means …
   A. development is more critical at early stages than later stages
   B. growth and development are individualized processes
   C. growth and development are cumulative in nature
   D. growth is influenced by environmental factors

4. Ambrose, a physically impaired student, finds it very difficult to use his fingers and hands to manipulate tools and materials. This indicates a deficit in …
   A. Fine motor movement
   B. Gross motor movement
   C. Movement skills
   D. Strength and endurance

5. Janet Ocran, a JHS 3 student, has shown a history of antisocial acts from childhood to date. She follows her own desires without considering the rights or desires of others. In the context of social deviation, Janet is …
   A. Antisocial
   B. Nonsocial
   C. A sociopath
   D. Unsocial

6. At which stage of language development does the child use two words to represent full sentences?
   A. Acquisition of complex rules stage
   B. Holophrastic stage
   C. Pre-speech communication stage
   D. Telegraphic speech stage

7. Adwoa could not identify a black and white sheep as a "sheep" because the only sheep she knows at home is pure white. This failure is an example of …
   A. Covert extension
   B. Overextension
   C. Overt extension
   D. Underextension

8. Mr. Nyanzu, a nursery teacher, helped a pupil learn new words by using "toffee" and "biscuits" because they met the child's needs. This behaviourist technique in language development is called …
   A. The echoic method
   B. The mand method
   C. The tact method
   D. The tactile method

9. Growth and development are asynchronous. This means …
   A. development is more critical at early stages than later stages
   B. growth and development are individualized processes
   C. growth and development are cumulative in nature
   D. growth is influenced by environmental factors

10. According to Noam Chomsky, the human brain is programmed to enable individuals to create and understand language. He termed this …
    A. Language acquisition device
    B. Language learning theory
    C. Linguistic acquisition device
    D. Linguistic learning theory

11. The type of learning in which knowledge, skills, and ideas are taught to others through deliberate telling, demonstration, and guidance is called …
    A. Accretion
    B. Acquisition
    C. Emergence
    D. Transmission

12. The unconscious way in which we learn our language and culture is called …
    A. Accretion
    B. Acquisition
    C. Emergence
    D. Transmission

13. According to Ivan Pavlov, the dog salivated to food (the unconditioned stimulus) even without the bell. Pavlov termed this salivation …
    A. Conditioned response
    B. Neutral stimulus
    C. Unconditioned response
    D. Unconditioned stimulus

14. Pavlov found that the dog did not salivate the first time the bell was paired with food. At this stage, the bell was …
    A. Conditioned response
    B. Neutral stimulus
    C. Unconditioned response
    D. Unconditioned stimulus

15. After repeated pairings, the bell alone elicited salivation. Pavlov then referred to the bell as …
    A. Conditioned stimulus
    B. Conditioned response
    C. Neutral stimulus
    D. Unconditioned stimulus

16. At the stage where the dog salivated in response to the bell after repeated pairings, Pavlov termed the salivation as …
    A. Conditioned stimulus
    B. Conditioned response
    C. Neutral stimulus
    D. Unconditioned response

17. Miss Constance Ackah, a basic four teacher, prevented a pupil from going out to play until she completed her corrections. This action is …
    A. Punishment
    B. Positive reinforcement
    C. Negative reinforcement
    D. Secondary reinforcement

18. Teacher Kojo rewarded John Blay, a Basic 5 student, for being punctual to school throughout the term. This is an example of …
    A. Punishment
    B. Positive reinforcement
    C. Negative reinforcement
    D. Secondary reinforcement

19. The learning theory that emphasizes processes of critical thinking rather than observed behaviours is …
    A. Behavioural learning theory
    B. Cognitive learning theory
    C. Constructivist learning theory
    D. Social learning theory

20. When learning one activity neither facilitates nor hinders learning another activity, it is called …
    A. Low-road transfer
    B. Negative transfer
    C. Neutral transfer
    D. Positive transfer

21. When a previously learned task enhances understanding of a new task, it is called …
    A. High-road transfer
    B. Negative transfer
    C. Neutral transfer
    D. Positive transfer

22. When there are few or no similarities between prior learning and a new problem, it is referred to as …
    A. High-road transfer
    B. Negative transfer
    C. Neutral transfer
    D. Positive transfer

23. Which of the following is NOT a reactive strategy for managing student behaviour?
    A. Behaviour contracts
    B. Consequences
    C. Removal
    D. Response cost

24. According to Jean Piaget, heteronomous morality is also called …
    A. Moral generalization
    B. Moral heterogeneity
    C. Moral realism
    D. Moral relativism

25. According to Lawrence Kohlberg, the three levels of moral reasoning include all the following EXCEPT …
    A. Conventional
    B. Inter-conventional
    C. Pre-conventional
    D. Post-conventional

SECTION B

[75 Marks]

Answer any THREE (3) questions. Each question carries 25 marks.

Question 1

(a) Discuss four (4) principles of human growth and development. (20 Marks)

(b) State five (5) educational implications of these principles for the classroom teacher. (5 Marks)

Question 2

(a) Several factors affect language development in children. Discuss any four (4) of these factors. (20 Marks)

(b) State five (5) educational implications of language acquisition in the classroom. (5 Marks)

Question 3

(a) State and explain three (3) factors that influence student learning. (9 Marks)

(b) Explain Thorndike's laws of learning:

i. The Law of Effect
ii. The Law of Exercise
iii. The Law of Readiness (6 Marks)

(c) Briefly explain the four (4) stages of Jean Piaget's theory of cognitive development. (10 Marks)

Question 4

(a) Briefly explain the term *Transfer of Learning*. (3 Marks)

(b) Explain four (4) conditions that facilitate transfer of learning. (12 Marks)

(c) Enumerate five (5) educational implications of transfer of learning. (10 Marks)

Question 5

(a) Define Behaviour Management. (3 Marks)

(b) Discuss four (4) behaviour management strategies that can be employed by upper primary teachers. (16 Marks)

(c) Mention three (3) approaches that can be used by upper primary teachers to manage the behaviour of students with Special Educational Needs (SEN). (6 Marks)
