1. Which principle is listed as fundamental in child-friendly design?
   a. Complex layering techniques
   b. Advanced colour gradients
   c. Multiple text elements
   d. Simplicity in form and function

2. What is one of the key considerations for age-appropriate graphics in early years?
   a. Secondary and tertiary colours
   b. Complex geometric patterns
   c. Primary colours
   d. Detailed text descriptions

3. In creating educational infographics, which one is an important component?
   a. Advanced animation
   b. Complex data sets
   c. Visual storytelling
   d. technical specifications

4. A visual/picture representation of a project is called a?
   a. Objectives of the list
   b. Storyboard
   c. Alpha test
   d. Beta test

5. What does the acronym ADDIE stand for when discussing Learning Objectives?
   a. Analysis, design, development, implementation and evaluation
   b. Analysis, design, delivery, imagination and evaluation
   c. Acquire, design, development, implementation, evaluation
   d. Analyze, deliver, design, imagine, examine

6.Computer Based Tutorials are _____ learning aids.
   a. Self learning
   b. Self tutor
   c. Self-paced
   d. Self taught

7. The phase of the ADDIE model that includes such activities as writing the course outline, deciding on color schemes and storyboarding is the _____
   a. Integration phase
   b. Design phase
   c. Develop phase
   d. Testing phase

8. Multimedia means the use of more than one .....in communication.
   a. file
   b. number
   c. media
   d. sound

9. The multimedia element that makes object move is called _____
   a. audio
   b. graphic

c. animation
d. video

10. Which professional development resource is used in early grade multimedia?
    a. Building Your Educational Design Portfolio
    b. Advanced Teaching Techniques
    c. Classroom Management Skills
    d. Student Assessment Methods

11. What type of elements is emphasized for early years graphics?
    a. Complex animations
    b. Large, clear visuals
    c. Detailed text
    d. Abstract concepts

12. How should content complexity issues be addressed in video production?
    a. Increasing technical terminology segments.
    b. Adding more advanced concepts segments.
    c. Breaking down ideas into smaller segments.
    d. Using professional jargon smaller segments.

13. In video production, what is recommended for maintaining student engagement?
    a. Longer video and duration.
    b. Complex and terminology.
    c. Interactive and dynamic content.
    d. Technical and demonstrations.

14. Which assessment method is used for evaluating video effectiveness?
    a. Teacher certifications.
    b. Engagement rates.
    c. Budget analysis.
    d. Equipment inventory.

15. What is the most common way to discover a media type?
    a. by file name
    b. by file location
    c. by file extension
    d. audio video internet

16. MP3 is an extension for a _____
    a. Sound
    b. video
    c. graphics
    d. data

17. During phase two of the multimedia application development, the attention or focus changes from planning to production
    a. True
    b. False
    c. None of the above
    d. All the above

18. All the following are multimedia elements except _____
    a. Digital

b. Text
c. Animation
d. Video

19. SME means...._____
a. Subject matter expert
b. Story matter expert
c. Subject maker expert
d. Story mater expert

20. A beta test is typically conducted with
a. Target audience
b. Designers
c. Developers
d. Employees

21. Joint Photographic Experts Group (JPEG) is used to compress _____
a. music.
b. pictures.
c. images.
d. frames.

22. Which of the following is included in the quality assurance process?
a. Marketing review checklist.
b. Content review checklist.
c. Budget analysis checklist.
d. Staff evaluation checklist.

23. Animations can be of _____ or _____ dimensional.
a. three, two
b. one, three
c. one, two
d. two, three

24. The multimedia element that explains idea through a picture is called.....
a. Audio
b. Video
c. Graphic
d. Animation

25. Which testing is done within the organization?
a. Beta testing
b. Part testing
c. Alpha testing
d. All testing

SECTION B

Answer three (3) questions in this Section

1. a) What is Educational Multimedia? [5 marks]

   b) Explain the following 4 roles in multimedia in Early Education [5 marks each]

   - Engagement through Multiple Senses
   - Supporting Different Learning Styles
   - Interactives Learning Experiences
   - Cognitive Development Support

2. State and explain any five (5) of the multimedia elements **[25 marks]**

3.State and explain the **ADDIE** instructional design model by outlining all the relevant steps. **[25 marks]**

4. a) Differentiate between Alpha and Beta testing **[5 marks]**

   b) Explain the following terms in multimedia project management. **[5 marks each]**

   - Time Management
   - Recourse Allocation
   - Team Roles
   - Review Cycles

5. Explain ANY **five (5)** principles of visual design. **[5 marks each]**

Good Luck.
