SCHOOL OF EDUCATION AND LEADERSHIP
COLLEGES OF EDUCATION
END OF SEMESTER TWO EXAMINATIONS FOR LEVEL 100, 2023/2024
B.ED. PROGRAMME

COURSE CODE: TEEG/TEUP/TEJS102

COURSE TITLE: SOCIAL, CULTURAL AND PSYCHOLOGICAL BASIS OF LEARNING

Instruction: Answer all questions in Section A and any three questions in Section B.
Time: 2 hours

SECTION A

[25 Marks]

Answer all the questions in this section.

1. Which of the following statements best describes child development?
 - A. Growth from the foetal stage to adulthood
 - B. Qualitative changes which occur in an orderly manner
 - C. Quantitative changes that lead to increase in bodily dimensions
 - D. Systematic and orderly changes towards maturity
2. The fact that development starts from the head and gradually proceeds towards the heels is termed as...
 - A. Proximodistal
 - B. Cephalocaudal
 - C. Epigenetic
 - D. Continuous
3. Ama's birth weight was 3.1kg. After some months, her weight became 12.3kg. In human growth and development, this means that Ama is...
 - A. Growing
 - B. Developing
 - C. Maturing
 - D. Learning

4. A major cognitive achievement of the child at the sensorimotor stage is...
- A. Object permanence
 - B. Conservation
 - C. Seriation
 - D. Mobility
5. At which of Erik Erikson's stages of psychosocial development do children learn to make things, use tools and acquire skills for adult life?
- A. Initiative versus guilt
 - B. Identity versus role confusion
 - C. Industry versus inferiority
 - D. Autonomy versus shame and doubt
6. Which of the following statements about growth at the childhood stage is true?
- A. Late childhood is a period of rapid growth
 - B. Boys experience physical maturation earlier than girls
 - C. Limb growth is slower than head growth
 - D. During infancy growth is faster than in childhood
7. Changes in feelings and how individuals relate to others fall under which domain of development?
- A. Physical
 - B. Intellectual
 - C. Psychosocial
 - D. Biosocial
8. Which of the following is a characteristic of the child during the preoperational stage of cognitive development?
- A. They can do operational thinking
 - B. They can do reversible thinking
 - C. They are usually self-centred
 - D. They can do abstract thinking
9. What is the name of the developing human between the 2nd and 9th weeks after fertilization?
- A. Foetus
 - B. Zygote
 - C. Embryo
 - D. Blastula
10. Ama likes practical application of ideas. According to Kolb, Ama is a/an ...
- A. accommodator
 - B. assimilator
 - C. diverger
 - D. converger

11. Which of the following terms is used to denote a situation where the child judges what is right or wrong in terms of how they satisfy his or her needs?
- A. Need-order orientation
 - B. Good boy-nice girl orientation
 - C. Instrumental-relativist orientation
 - D. Law and order orientation
12. A major achievement of the child at the concrete operation stage is ...
- A. Object permanence
 - B. Conservation
 - C. Symbolic thought
 - D. Abstract reasoning
13. Akosua learns well by using body language, acting and using her hands to create or build. Akosua is a...
- A. Visual learner
 - B. Solitary learner
 - C. Auditory learner
 - D. Kinaesthetic learner
14. Jane and Mimi were born on the same day in the same hospital. If both of them are exactly the same weight, which other factor is likely to determine if there is any difference in their eventual weights?
- A. Quality of their parents' diet
 - B. Quality of their diet
 - C. How physically active they are
 - D. How physically active their parents are
15. The suggestion that teachers should create an environment enriched with a lot of teaching and learning materials implies that growth and development are...
- A. continuous
 - B. cumulative
 - C. characterised by critical periods
 - D. influenced by heredity and environment
16. Teacher Mensah uses verbal analogies and storytelling to demonstrate his points. Which group of learners will Teacher Mensah appeal to most?
- A. Visual
 - B. Auditory
 - C. Kinaesthetic
 - D. Solitary

17. According to Kolb, learners who learn primarily by "hands-on"/through practical activity are...
- A. Accommodators
 - B. Assimilators
 - C. Divergers
 - D. Convergers
18. Adwoa is a child born to an African mother. She sits before crawling, stands before she walks and babbles before she speaks. Which of the principles of growth and development best describes Adwoa?
- A. Growth and development are influenced by environmental factors
 - B. Growth and development are sequential
 - C. Principle of individual differences
 - D. Principle of predictability
19. In human development, when development starts from the centre line of the body to the outer parts, it is known as...
- A. asynchronous direction
 - B. cephalocaudal direction
 - C. epigenetic direction
 - D. proximodistal direction
20. Francis and Francisca were born on the same day at the same hospital. Francisca has, however, grown bigger and taller than Francis. Which principle of growth and development explains their development differences? Growth and development are...
- A. characterized by critical periods
 - B. cumulative
 - C. individualized processes
 - D. orderly sequences
21. By the seventh month of pregnancy, the eye can distinguish light from darkness, and the brain has more control over body system. What stage of development has this feature?
- A. Embryonic stage
 - B. First trimester
 - C. Foetal stage
 - D. Germinal stage
22. A 14-year-old boy shows exceptional sporting ability. Both of his parents are sportspersons, and so they send him for coaching every day and train him on weekends. The 14-year child's capabilities are most likely to be the result of an interaction between...
- A. discipline and nutrition.
 - B. growth and development.
 - C. health and training.
 - D. heredity and environment.

23. Mrs. Azuggu explained to his class that development proceeds from the head downwards. According to her, a child gains control of the head first, then the arms and the legs. She further explained that spinal cords develop before the outer of the body part. These explanations by Mrs. Azuggu are based on the principle of human growth and development which states that growth and development...
- A. follow a pattern.
 - B. are a product of an interaction.
 - C. are a continuous process.
 - D. proceed from general to specific.
24. Mr. Afeti, who is a developmental psychologist, explained to his students that there is a stage during pre-natal human development where the blastocyst's outer layer of the cell specializes into two membranes. He further states that the outer membrane called the chorion develops into two organs, the placenta and the umbilical cord. This stage that Mr. Afeti is talking about is called the...
- A. embryonic stage.
 - B. foetal stage.
 - C. germinal stage.
 - D. implantation stage.
25. Mr. Teye-Wayo is a basic school teacher at the University of Ghana Basic School. He understands the basic aspect of human growth, development and maturation due to the training he had. He understands that growth and development of children consist of both qualitative and quantitative changes. His understanding about growth and development will enable him as a teacher to...
- A. be clear about teaching diverse learners
 - B. become unconscious of the importance of individual differences
 - C. be uncertain of the principles of child psychology
 - D. gain control of learner's emotions while teaching

SECTION B
[75 Marks]

Answer any three questions in this section.

Question 1

As a student teacher who has studied *Social, Cultural and Psychological Basis of Learning*, discuss with practical examples **five (5)** educational implications of Jean Piaget's levels of cognitive development. **(25 marks)**

Question 2

- a) Distinguish between maturation and learning. **(4marks)**
- b) Describe each of the following structures under the embryonic stage of pre-natal development.
 - (i) Ectoderm **(2marks)**
 - (ii) Mesoderm **(2marks)**
 - (iii) Endoderm **(2marks)**
- c) Explain each of the following Chromosomal Abnormalities:
 - (i) Down Syndrome **(5marks)**
 - (ii) Turner's Syndrome **(5marks)**
 - (iii) Klinefelter's Syndrome **(5marks)**

Question 3

- a) Describe the major characteristics of each of the following learners according to the VAK model:
 - i. Visual learners **(2 marks)**
 - ii. Auditory learners **(2 marks)**
 - iii. Kinaesthetic learners **(2 marks)**
- b) As a student of *Social, Cultural and Psychological Basis of Learning*, discuss **two (2)** ways in which teachers should teach each of the visual, auditory and kinaesthetic learners to learn effectively. **(18 marks)**
- c) State one educational implication of VAK learning model. **(1 Mark)**

Question 4

With relevant examples, explain each of the following concepts. **(25 marks)**

- a) Positive Reinforcement (5 marks)
- b) Negative Reinforcement (5 marks)
- c) Punishment (5 marks)
- d) Extrinsic Motivation (5 marks)
- e) Intrinsic Motivation (5 marks)

Question 5

- a) Explain **three (3)** heredity factors that affect the proper growth of infants during the pre-natal stage. **(9 marks)**
- b) Discuss four (4) environmental threats to the growth and development of humans. **(16 marks)**
